

HABITAT FOR HUMANITY AND FALCON TERMITE & PEST CONTROL HELP CENTRAL FLORIDA FAMILIES

ORLANDO, FL, JUNE 5, 2009: Habitat for Humanity Orlando conducted the opening ceremony yesterday for its largest and most ambitious project since its inception: Staghorn Villas. Staghorn Villas, located in Orlando, Florida is an \$8 million dollar, 3.9-acre town home community designed to provide housing for up to 58 local needy families. Construction began in October of 2008, and the first 6 homes are complete and ready to be inhabited. 6 of the first families were given the keys to their new homes at the ceremony.

Falcon Termite & Pest Control has provided preventative and curative treatments for over 100 of Habitat for Humanity's construction projects, including Pre-treatments and Integrated Pest Management. The

pest, lawn, and termite company will be using its own process; Pest Shield® which utilizes Nisus® Borate products to prevent termites and pest infestations to the Staghorn Villa complex. C.E.O. Louis Witherington said "This gift to the community is the best way for Falcon to celebrate its upcoming 40th year in Central Florida."
